

**DEVICE FOR EXTRACTING PARAMETERS FOR DECODING A VIDEO
DATA FLOW CODED ACCORDING TO AN MPEG STANDARD**

Abstract

^A
C ~~The present invention relates to a~~ device for extracting parameters for
decoding a video data flow, contained in headers preceded by a starting code of series of
C data coded according to an MPEG standard, ^{organized} ~~including means for organizing~~, independ-
C ently and according to the starting code, ^{and} ~~a~~ storage of the parameters in three register
banks.
